Deadline for manuscript  
submissions:  
**closed (31 October 2022)**

### Message from the Guest Editor

Dear Colleagues,

Improving water resource management to ensure that everyone has access to safe and clean water is critical for essential human survival. The 2030 Agenda for Sustainable Development highlights the importance of water in Goal 6, which aims to “ensure access to water and sanitation for all” (SDGs).

Nowadays, we are experiencing a global pandemic that is leading us to a new normal. Providing safe and clean water for all is a critical element in fighting this crisis. On the other hand, urban wastewater treatment plants (WWTPs) can be a significant part of circular sustainability due to the integration of resource recovery and energy production during clean water production.

This Special Issue will contribute to this objective by collecting articles addressing the development and application of current and novel water and wastewater treatment technologies from a sustainability perspective. The Special Issue focuses mainly on modern water and wastewater technologies. It aims to stimulate the interest of scientists about the latest developments in the field of water and wastewater management.

I look forward to receiving your contributions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
