

Special Issue

Sustainable Food Consumption: New Trends in Food Consumer Behavior

Message from the Guest Editors

The global food and agriculture situation is still severe; we are facing inflations, a rise in food price, and unexpected diseases (e.g., Avian influenza). How do we make our ecosystem more sustainable with more planet-friendly initiatives? What are the recent trends in food consumer behavior under the effects of global warming and a pandemic? These questions require attention from both academic and industries to address and make corresponding changes. In this case, this Special Issue would like to bring this to the audience attention and provide an opportunity to have a discussion on these related topics. The specific topics relevant to this Special Issue include, but are not limited to, new trends in food behaviour consumption, new sensory aspect or evaluation, food supply chain changes, new product development strategies (plant-based foods, cultured meats, etc.) or technologies, that enable a more sustainable food and agriculture world. Review papers concerning food consumer behaviours which address the issues related to sensory, sustainability, environmental friendliness, and low food waste are also welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
