

Special Issue

Advances in Sustainable Supply Chain Management and Logistics

Message from the Guest Editors

Climate change, resource scarcity, and social responsibility challenges have intensified the emphasis on sustainable supply chain management and logistics. Conventional supply chains are under heightened examination due to their substantial resource usage, emissions, and ecological effects. All of this is leading to a transition towards models that emphasize sustainable practices. This Special Issue aims at enhancing both theoretical and practical comprehension of sustainable supply chain management in relation to sustainable development and operations. This Issue invites submissions that demonstrate interdisciplinary research, linking environmental science, operations research, and economics to tackle the complex challenges in sustainable logistics and supply chains. Specific topics of the Special Issue include, but are not limited to, the following: Green and circular supply chains; digitalization and sustainable supply chains; risk management and resilience in sustainable supply chain management. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
