

## Special Issue

# Going Green: Pro-environmental Behavior and Civic Participation for a Sustainable Future

### Message from the Guest Editor

Tackling environmental issues is not just the goal of governments or global initiatives, it also requires conscious and informed individual action privately and publicly. Through the transformation of everyday habits and through decisions grounded in factual environmental knowledge, individuals can have a strong influence on both governments and businesses, shaping products and services through their actions. This Special Issue is directed at research that uncovers the mechanisms through which individual action can lead to sustainable outcomes and pro-environmental behavior in general, prioritizing novel approaches, especially those that include an element of civic participation. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Pro-environmental behaviour;
- Environmental behaviour and its links to psychological well-being;
- Environmental citizenship;
- Civic participation in environmental actions;
- Community initiatives for sustainability.

I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
