

## Special Issue

# Innovations in Environment Protection and Sustainable Development

### Message from the Guest Editor

Despite advancements in environmental protection and sustainable development, several urgent issues persist today. These include climate change, characterized by rising global temperatures, extreme weather events, and sea level rise, and the significant threats they pose to ecosystems, human health, and the economy. Deforestation, driven by agricultural expansion and urbanization, is another major contributor to increasing carbon emissions and declining biodiversity. Additionally, overconsumption and poor waste management practices lead to greater environmental pollution and resource depletion. Analogously, economic inequality and the poorly implemented policies related to it make it difficult to solve these problems. Environmental protection and sustainable development are essential for fostering a harmonious relationship between humanity and the planet. By integrating sustainable practices across all sectors—the economy, politics, and society—we can ensure a prosperous future for both the Earth and future generations. This Special Issue focuses on the current state of knowledge on the links between environmental protection and sustainable development.

### Guest Editor

Dr. Rasa Vaiškūnaitė

Faculty of Environmental Engineering, Department of Environmental Protection and Water Engineering, Vilnius Gediminas Technical University, Vilnius, Lithuania

### Deadline for manuscript submissions

30 November 2025

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
