

## Special Issue

# Macroeconomic Policies and Sustainable Economic Growth in Emerging Countries

### Message from the Guest Editors

The aim of this Special Issue is to analyse how macroeconomic policies can enhance sustainable economic growth. Many countries have experienced booms and busts in their economies due to the use of unsustainable policies such as sharp fiscal expansions. The more successful economies have followed policies that have ensured steady increases in productivity and innovation, enabling steady and predictable growth rates. The main policies used to ensure sustainable growth are policies on innovation, improvements in human capital and skills, supply-side policies, international treaties and appropriate fiscal policies including environmental taxes or subsidies and monetary policies. The main aim of this Special Issue is to analyse macroeconomic policies and approaches that can ensure economic growth and development is sustainable, either through ensuring long-run stable growth or environmentally friendly growth. We welcome the submission of theoretical or empirical studies as well as reviews. We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
