Special Issue

Theory and Practice of Sustainable Economic Development

Message from the Guest Editors

There are many perspectives to consider when writing about sustainable economic development. Many authors have analyzed the relationship between environmental or social variables and various economic indicators such as GDP, income per capita, etc. Others have focused on the processes that enable a sustainable economic development, for example, sharing economy or intergovernmental programs, while others have explored the transformation of specific industries and the development of instruments such as green finance. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Green economy;
- Green transition of various industries;
- Cycling economy;
- Sharing economy;
- Models covering environmental, social, and SED indicators;
- Business strategies leading to SED;
- Trends in ESG reporting.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
