

Special Issue

Advanced Research on Waste Management and Biomass Valorization

Message from the Guest Editor

This Special Issue's scope and goal are to observe the current developments and trends in waste management and biomass valuation study. It will introduce the most recent research and developments in waste management and valuation, which could resolve some current issues (e.g., wastewater; wastewater treatment, renewal energy, etc.) and provide new opportunities for the local provision of green technology. One of the most important study topics across the globe is waste management and biomass valuation, and encouraging new research articles or manuscripts that focus on the current problem will have additional advantages. The current topic can provide a forum for collaboration and communication, encourage research and innovation, raise awareness of important issues, and bring experts together to discuss biomass valuation and waste management. In addition, issues about sustainability, socioeconomics, science, and integrated approaches to sustainable development will be covered in this Special Issue. The goal of the current topic is to define, quantify, measure, and track sustainability, including sustainability tools, applications, and related laws and policies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
