New Trends in Sustainable Transportation

Message from the Guest Editors

The world of transportation has faced several challenges in recent years, within different fields. These changes are mainly due to ever greater attention paid to the impact that transport has on society. In light of this consideration, new trends are rising in the transportation world to create a more sustainable environment. The concept of sustainability, in this case, can be addressed from multiple perspectives, starting from the idea of safer roads through the introduction of emerging technologies or valuable countermeasures that can reduce the crash frequency or severity. This result can also be achieved by relying on newly developed methodologies and models for road safety assessment that are more in line with the contingent traffic necessities. Sustainability in transport can also be interpreted in the more classic way of reducing pollution and increasing shared transport modalities, proposing valuable alternatives to the private vehicle in favor of micromobility, new bicycles, and pedestrians, or improving the already existent public transport with smart and efficient strategies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
