

Special Issue

Research on Urban Air Pollutant Emissions and Co-control Strategies with Climate Action

Message from the Guest Editors

This Special Issue will explore the synergies on integrated air quality and climate action, highlighting the ways in which air pollution emissions standards have accelerated the adoption of renewable energy and electromobility. The works published will discuss how a lack of integration has led to false solutions that have come at a cost to air pollution standards. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- atmospheric modelling;
- emissions modelling;
- cost-benefit analysis;
- effect of carbon pricing in mitigation of emissions;
- black carbon;
- electrification of heating, cooking and transportation;
- leapfrogging technologies;
- energy poverty;
- renewable energy policy;
- emissions standards;
- green hydrogen.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
