

Special Issue

Innovating for Sustainability: Digital and Circular Strategies in the Twin Transition Era

Message from the Guest Editors

The twin transition—digital and ecological—represents a transformative force reshaping societies, industries, and territories in the pursuit of sustainable development.

This Special Issue focuses on how innovation enables and accelerates this dual transformation, particularly through the lens of circular economy principles and remanufacturing practices, which are essential levers for promoting resource efficiency, resilience, and long-term environmental sustainability. We particularly welcome papers that address business models, socio-technical systems, governance frameworks, and monitoring tools that foster innovation and sustainability.

Topics such as remanufacturing, reuse, industrial symbiosis, and product-service systems are central to this call. Contributions include (but are not limited to):

- Environmental impact monitoring methodologies;
- Sustainable and smart mobility solutions;
- Household energy and emissions reduction;
- R-strategies and circular economy practices;
- Digital tools for sustainability;
- Consumer behaviour in the twin transition context;
- Policy and governance innovations;
- Circular business models;
- Urban and territorial applications;

Guest Editors

Prof. Dr. Donato Iacobucci

Dr. Marco Ciro Liscio

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
