

Special Issue

Economics of Energy in the Context of Carbon Emissions and Environmental Sustainability

Message from the Guest Editors

We invite researchers and scholars to contribute original research articles to this Special Issue. The aim of this Special Issue is to investigate the multifaceted connections between energy economics, carbon emissions, and environmental sustainability. Therefore, the research papers in this Issue should aim to explore the economic mechanisms governing energy production, consumption, and their associated carbon emissions. This Special Issue will cover a wide range of topics, including the following: disaggregated energy generation/consumption (renewable/non-renewable) and its impact on carbon emissions or environmental sustainability, sectoral energy generation/consumption (industrial/transport/agricultural/service) and its impact on carbon emissions or environmental sustainability, and sources of energy generation/consumption (coal/wind/solar hydro/nuclear/LNG) and their impact on carbon emissions or environmental sustainability. We look forward to your contributions to this important topic that address the critical intersection of energy economics and environmental sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
