

## Special Issue

# Renewable Energy Technologies and Sustainable Economy

### Message from the Guest Editor

This Special Issue on "Renewable Energy Technologies and Sustainable Economy" investigates the most recent advances, problems, and prospects in sustainable development. The focus is on the development and optimization of renewable technologies, the integration of decentralized energy systems, economic and social implications, and policies that promote sustainable practices. Its scope covers a wide range of subjects, providing a detailed venue for experimental, computational, and theoretical study. The purpose is to increase our understanding and promote sustainable energy solutions using a multidisciplinary approach. By addressing key areas, such as industrial development and energy crisis, sustainable production and consumption patterns, new and renewable energy sources, and sustainable energy preservation methods, this Special Issue will significantly supplement the existing literature.
