

## Special Issue

# Individual Differences in Well-Being: Measures, Predictors, Interventions, and Mechanisms

### Message from the Guest Editors

For this Special Issue, we are inviting submissions of high-quality papers that examine measures, predictors, interventions, and mechanisms related to individual differences in well-being. This Special Issue will cover topics including, but not limited to:

Research in identifying the demographic, experiential, cognitive social, health, and personality predictors of individual differences in well-being outcomes;  
Intervention studies to enhance well-being in different populations, contexts, and cultures;  
Replications of studies previously published on individual difference in well-being;  
The development or validation of well-being assessments;  
Theoretical conceptualizations of well-being;  
Studies of processes and mechanisms underlying well-being and psychological functioning;  
Cross-cultural comparisons on the antecedents, mechanisms, and predictors of well-being;  
The development of new paradigms to study individual differences in well-being.
