

Special Issue

Innovation Management, Organizational Resilience, and Performance: Pathways to a Sustainable Future

Message from the Guest Editors

In a VUCA environment, constant change is the norm. Organizations face process reshaping, operational scale tweaks, and blurred boundaries—all tied to long-term sustainability. They must adapt to digital innovation and technological complexity, upgrade skills, and adjust operations when allocating resources. This dynamic landscape makes organizational resilience—its ability to withstand and adapt to challenges—key to effectiveness. It is a developable capacity to rebound and flourish, serving as a cornerstone of sustainable vitality.

Literature highlights its role: minimizing disruption, fostering positive attitudes and behaviors, and underpinning sustainable performance. This Special Issue aims to generate theoretical knowledge and empirical evidence on designing and implementing sustainability-aligned organizational practices, addressing organizational resilience, and ensuring long-term organizational sustainability. It encourages scholars from diverse disciplines to contribute by integrating ideas and insights across resilience, the incorporation of sustainability into organizational practices, and sustainable organizational development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
