Special Issue

Co-design and Social Innovation for Climate Neutrality

Message from the Guest Editors

Climate neutrality is an urgent and complex challenge that cannot be reached with top-down technological solutions alone but requires multidisciplinary knowledge and citizens-centered solutions for systemic change. Social innovation is increasingly valued for its transformative role in promoting people-centered approaches through co-designing solutions for the systemic change of socio-cultural systems. Departing from technological solutions and top-down policymaking, user-centered solutions and services requires the involvement of networks of actors and the ability to co-design solutions, learn from experimentation through appropriate and relevant assessment methodologies. The aim of the Special Issue is to foster a discussion of the role of co-design and social innovation, service design and policy design for reaching carbon neutrality through a comprehensive multidisciplinary approach. We welcome papers based on theoretical, qualitative, quantitative and mixed methods studies which reflect and provide evidence of the relevance and need of considering design approaches and people-centered solution to reduce GHG emissions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
