

Special Issue

Sustainable Research on Water Quality and Organic Micropollutants

Message from the Guest Editor

Sustainable research on water quality and organic micropollutants is a key area of contemporary environmental science, addressing the growing challenges posed by human impact, climate change, and the health security of ecosystems and societies. This Special Issue aims to present the latest advances in analytical methods, environmental monitoring, pollutant fate and transport modeling, and ecological and health risk assessment. Particular emphasis is placed on sustainable research approaches, including the development of energy- and material-efficient analytical techniques, solutions based on the principles of green chemistry, and innovative water and wastewater treatment technologies.

Guest Editor

Dr. Mirela J. Wolf-Baca

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
