

Special Issue

Agricultural Engineering for Sustainable Production and Circular Economy

Message from the Guest Editors

This Special Issue invites original research papers thematically related to agricultural engineering, precision agriculture and technology 4.0, production, utilization and circular production issues. The thematic scope fits into the broadly understood issue of sustainable development in food production, using modern food production and processing technologies that interfere as little as possible with the natural environment. The scope of this Special Issue also covers innovative devices and applications in the field of mechanical engineering, as well as bioengineering combined with environmental protection. Research areas may include (but are not limited to) improving technology and production processes in the agri-food industry; artificial intelligence and machine learning in industry and precision agriculture systems; the impact of technological progress on changes in production methods used in industry and agriculture; technological lines used in industry; and integrated production methods used in sustainable, ecological, and precision agriculture. Review articles containing the latest scientific reports within the intended scope are also encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
