

Special Issue

Project Management, Building Information Modelling and Sustainable Construction Practices

Message from the Guest Editors

We are pleased to invite you to contribute to this Special Issue, “Project Management, Building Information Modelling and Sustainable Construction Practices”.

Building Information Modeling (BIM) and sustainable construction practices are two key elements shaping the modern construction industry. BIM is a digital representation of the physical and functional characteristics of a building, providing a collaborative platform for architects, engineers, and construction professionals to plan, design, construct, and manage buildings more efficiently. On the other hand, sustainable construction practices focus on reducing the environmental impact of construction projects, promoting energy efficiency, resource conservation, and overall sustainability. By combining BIM technology with sustainable construction practices, construction professionals can create more environmentally friendly, energy-efficient, and cost-effective buildings.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
