

Special Issue

Sustainable Development in Organizational Culture and Leadership

Message from the Guest Editor

With the rapid development of information technology, human-machine collaboration has been promoted in organizations, and sustainable development has gradually become an important issue in the world today. Organizations play a crucial role in promoting sustainable development, and organizational culture and leadership are essential factors that determine the success of sustainability initiatives. During this process, employees' innovative behavior, unsafe behavior, work engagement, emotional labor, and more may be affected.

Therefore, we invite submissions of original research papers, case studies, and reviews that explore the relationship between sustainable development, organizational culture, and leadership. The manuscript topics we will accept include, but are not limited to, sustainable development, organizational culture, leadership, innovative behavior, algorithm management, AI applications in organizations, human-machine collaboration, and more.

The aim of this Special Issue is to bring together scholars and practitioners to share their research findings, insights, and experiences related to sustainable development, organizational culture, and leadership.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
