

# Special Issue

## Urban Innovation and Sustainability

### Message from the Guest Editor

This SI will complement the current knowledge production, research and development, and policy advocacy discussions on the 'Value of Sustainable Urbanization', 'Envisaging the Future of Cities', and the implementation of the New Urban Agenda. Engendering urban innovations for sustainability will require the development and implementation of multi-stakeholder partnerships as well as public-private partnerships. Given the urgency of understanding and tackling emergent issues and challenges in cities and human settlements around the world, researchers, scholars, planners, policymakers, and development practitioners have been working towards developing and experimenting with urban innovations for achieving sustainability. In view of the above, this Special Issue (SI) invites original research articles as well as review papers on 'urban innovation and sustainability'.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
