

Special Issue

Advances in Sustainability, Digital Transformation, and Supply Chain Maturity

Message from the Guest Editors

This Special Issue seeks to compile original research on the increasing maturity of supply chain sustainability integration and digital transformation. Research areas may include (but need not be limited to) the following:

- Maturity models for the integration of digital transformation and sustainability in supply chains;
- The role of digital technologies in advancing sustainability maturity in logistics (e.g., IoT for real-time monitoring, AI for resource optimization);
- The evaluation of supply chain maturity in adopting circular economy principles and reverse logistics;
- Case studies on the drivers and barriers of firms at different maturity levels in achieving sustainable supply chain goals;
- Frameworks for assessing digital and sustainability maturity and their impact on global supply chain resilience;
- Digital transformation maturity in sustainable procurement and green logistics;
- Research on how supply chain maturity influences the ability to identify, assess, and mitigate risks (i.e. what are the key risk factors that organizations at different maturity levels should prioritize?).

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
