

Special Issue

Sustainable Electrical Engineering: Powering a Greener Future

Message from the Guest Editor

This Special Issue explores advancements in sustainable electrical engineering, highlighting research addressing climate change and energy transition through renewable technologies, smart grids, and energy-efficient practices. Fostering interdisciplinary collaboration will present innovative solutions and methodologies that enhance sustainability. This aligns with the journal's scope, promoting electrical engineering practices focused on environmental stewardship and resource efficiency and encouraging dialog on the socio-economic implications of transitioning to greener energy systems. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Renewable Energy Integration; Smart Grids and Energy Management; Energy Storage Solutions; Energy Efficiency in Buildings; Electric Vehicles and Charging Infrastructure; Microgrids and Decentralized Energy Systems; Policy and Regulation for Sustainable Energy; Environmental Impact Assessments; Education and Workforce Development; Intelligent Software Solutions for Sustainable Energy Management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
