

Special Issue

Well-Being and Urban Green Spaces: Advantages for Sustainable Cities

Message from the Guest Editors

This Special Issue (SI) focuses on the advantages of urban green spaces for building sustainable cities and for the well-being of city inhabitants. This SI aims to showcase public, private and community projects and initiatives that, individually or in association with practices and policies, pave the way for building sustainable cities and contribute to the promotion of well-being. This SI also welcomes papers on research studies and reviews addressing the concepts, issues and interconnection of the three main themes: well-being, urban green spaces and sustainable cities. Urban green spaces can be quite diverse, with different natural elements, formats, areas and service provisions; they can be as simple as a green corridor or as complex as an urban farm or a wide park. Papers analyzing and discussing the different contributions of urban green spaces to the promotion of well-being and to sustainability in cities are particularly important for this SI.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
