

## Special Issue

# Sustainability and Innovation in Engineering Education and Management

### Message from the Guest Editors

The construction industry is complex, establishing the base within the three major sectors in which economic activities are set. Education in those areas is of great importance. Improving the scientific and practical knowledge of students and key projects' personnel is very important for the efficiency and sustainability of the construction industry. There is a high degree of migration of engineers and construction managers in the construction sector. For this reason, construction managers' qualifications and skills should be recognized and researched in the same way all over the world. The aim of this Special Issue is to provide valuable insights into sustainability in education across a broad range of construction-related issues, with a specific interest in didactic methods, empirical evidence and applications, simulations, as well as conceptual frameworks. We are looking for sustainable educational solutions for the construction industry related to each of the five common phases of sustainable construction projects: (1) feasibility, (2) design, (3) execution, (4) commissioning and operation, including maintenance, and (5) demolition.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
