

Special Issue

Sustainable Transport: Logistic, Optimization, Traffic Flow and Road Safety

Message from the Guest Editors

Dear Colleagues, We believe that transportation systems play a vital role in achieving global sustainability goals, encompassing environmental protection, economic development, and social well-being. We see technological innovations as valuable tools to monitor the impacts of mobility, while a multidisciplinary approach can help develop strategies that integrate logistics flow planning, optimization methods, traffic flow management, and advanced safety measures. With this Special Issue, "**Sustainable Transport: Logistics, Optimization, Traffic Flow, and Road Safety**", I aim to create a platform to showcase cutting-edge research and practical applications that contribute to the development of sustainable and equitable transport solutions. By exploring these topics together, I hope to enhance our collective understanding of how sustainable transport systems can be implemented on various scales, from urban mobility to regional and global logistics networks. I look forward to reading your contributions and working together to shape the future of sustainable transportation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
