Sustainable Development of Mountain Tourism

Message from the Guest Editors

Mountain tourism, however, is a complex phenomenon. Due to its intrinsic ability to satisfy a vast range of tourism needs, from leisure to health and wellness and from nature to outdoor sports (Richins et al., 2016), mountain tourism represents an important source of revenue for many local communities. On the other hand, tourism can also cause natural and cultural degradation in mountain regions through its impacts on ecosystems, biodiversity, and local populations. Overtourism, urbanization, the exploitation of natural resources, pollution, and the loss of local culture are matters of ongoing discussion and debate among scholars, politicians, and practitioners, with the key question of how to balance the positive economic impacts of tourism with social and environmental issues attracting increasing public attention and opinion. The concept of sustainable mountain tourism underwent a phase of intense development during the 2000s, corresponding to an overall analysis of what was being observed at the time, leading to the earliest understanding of the concept of sustainability in mountain tourism, accompanied by an awareness of its impact on natural environments.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
