

Special Issue

Nutrition, Health and Sustainable Food Systems

Message from the Guest Editor

The aim of this Special Issue is to explore new ways of conceptualizing the interlinkages among nutrition, health, and sustainable food systems and to help chart a path forward in a world facing critical challenges with respect to malnutrition, food inequity, and unsustainable production practices against the backdrop of some of the greatest environmental ecological challenges of our time. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Enhancement of the environmental and/or economic sustainability of institutions within modern food systems
- Trends in sustainable production practices in the production, processing, and distribution sectors for food and/or commodities
- Innovations in sustainability affecting the institutional structures of existing food systems
- Visionary explorations of what future food systems might strive to accomplish
- Investigations of health impacts of food inequity and how refinements to existing food systems might mitigate these impacts
-

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
