

Special Issue

Low Carbon Innovation: Energy Policy and Strategic Technology Planning

Message from the Guest Editors

This Special Issue aims to explore the scientific issues related to technology planning and policy design in consideration of new technology innovation that supports the national carbon neutrality strategy. It seeks to offer new insights into enhancing the modeling capacity to effectively manage low-carbon transition and climate change. We invite original research articles and critical reviews on topics related (but not limited) to the following:

- Preference and impact analysis of energy policies;
- Policy modeling with multi-agent behaviors and game theory;
- Incentive policies and mechanism design for low-carbon innovation and distribution in various regions and industries;
- Techno-economic analysis for the low-carbon transition in power systems;
- Modeling and dynamic optimization of emission reduction mechanisms;
- Potential for disruptive energy technological innovation to accelerate decarbonization;
- Green finance, corporate green investment, corporate governance structure, and green technology innovation;
- Related topics of outward foreign green direct investment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
