Special Issue

The Interplay of Energy Consumption and the Digital Economy in the Pursuit of a Low-Carbon Transition

Message from the Guest Editors

As one of the indispensable elements of sustainable economic development, a reduction in energy consumption is essential in order to promote the balanced development of economic efficiency and environmental efficiency. As the impact of traditional energy consumption on climate change has become increasingly prominent, the low-carbon transformation is crucial for sustainable economic development and energy structure transformation. In this context, the role of the digital economy is becoming increasingly significant, especially regarding the energy structure transformation of, and reduction in, energy consumption, which is essential in order to promote low-carbon transitions and achieve the goal of carbon neutrality.

In this Special Issue, we aim to delve into the interplay between energy consumption and digital economy, as well as their critical role in facilitating the low-carbon transition in different countries. We are particularly interested in exploring how the digital economy can reduce excessive energy consumption and how it can support the achievement of low-carbon development and sustainable strategies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
