

## Special Issue

# Advances in Sustainable Energy Technologies

### Message from the Guest Editors

In recent decades, the increase in global energy demand, and the aim of supplying every inhabited point on the planet, has progressively relied more and more on the use of renewable energy sources, as opposed to fossil fuels and nuclear energy.

This Special Issue aims to present the latest advances, at any scale of application, related to the technological development, improvement, and integration, as well as the normative regulation of the sustainable energy sources, energy storage, conversion, distribution, and utilization technologies, whatever their level of technological maturity and their nature. In this sense, it is open not only to studies on renewable energy sources, but also to studies dealing with the conversion of conventional fossil fuels or nuclear power into more sustainable technologies.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
