

## Special Issue

# Research on Green Mining Technology with Cemented Paste Backfill

### Message from the Guest Editors

Cemented paste backfill (CPB) is an effective practical approach for green mining and the sustainable development of the mining industry because of its advantages of being safe, environmental, economic, and highly efficient. CPB can use solid waste in mines (tailings) to treat the two major hazardous sources (underground goafs and surface tailing ponds caused by mining). To introduce new ideas and achievements in the field of green mining with cemented paste backfill, we sincerely invite you to contribute a paper to the Special Issue "Research on Green Mining Technology with Cemented Paste Backfill" in *Sustainability*. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Tailing thickening;
- Paste pipeline transportation;
- Paste mixing and preparation;
- Comprehensive utilization of solid waste;
- Functional backfill;
- Paste rheology;
- Modification of slag;
- Underground CO<sub>2</sub> storage;
- Environmental impact of CPB.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
