

## Special Issue

# Microplastic Research and Environmental Sustainability

### Message from the Guest Editor

This Special Issue focuses on the latest developments in extricating the sources and pathways of microplastics in wildlife and humans, with the aim of informing sustainable management practices and policy frameworks. By fostering interdisciplinary collaboration and integrating scientific findings with practical solutions, this collection seeks to advance global efforts in combating microplastic pollution and promoting environmental sustainability. In this Special Issue, original research articles and reviews are welcome and research areas may include, but are not limited to:

- The sources and pathways of microplastics;
- Microplastics in food and water;
- Biomagnification and biodegradation;
- The ecological impacts of microplastics;
- Human health risks;
- Policy and regulatory frameworks;
- Sustainable management practices.

I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
