# University 4.0 Sustainable Development in the Way of Society 5.0

## Message from the Guest Editors

In the period of civilization 5.0, the educational institution of universities exist. It is believed that systems of the social and virtual worlds would be able to close any gaps and address any problems throughout the Society 5.0 timeframe. In order to actualize or prepare for era society 5.0 in the domain of education, students need to be able to think critically. constructively, and creatively, as well as having an appropriate understanding of their learning styles. Being intelligent and well-integrated with both the real and digital worlds, civilization 5.0 is a society. Society 5.0 has the following characteristics: (1) complete adoption of ICT; (2) community focus; (3) engagement of people; (4) shared ideals of sustainability, inclusiveness, effectiveness, and intellectual power; and (5) development of economic disruption. Higher education institutions are essential to sustainability. Higher Education 4.0 is the term used to describe the change brought about by Industry 4.0 in higher education and instructional approaches (called an Education or Edu 4.0). The rising need for a more sustainable society has had a substantial influence on higher education.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief
