# Advanced Research on Sustainable Performance Optimization in Electrical Systems

### Message from the Guest Editors

The search for intrinsic usage-limited performance can lead to poor life cycle solutions in terms of resource consumption, pollution, greenhouse gas emissions and other environmental impacts. Despite the fact that electrical systems are known to greatly improve energy efficiency, they have disastrous impacts on the environment. An awareness is growing among research laboratories, increasingly considering environmental issues related to the new and old uses of electrical systems. For instance, although it is necessary, the use of renewable energy for a system to be sustainable. For it to be sustainable, the environmental cost of the system itself over its life cycle must be considered. This complex problem needs first to be characterized specifically for electrical systems. Then, tools must be designed to address the issues, to find the trade-offs between functional and environmental performance. Thus, this defines sustainable performance optimization of electrical systems, the scope of this Special Issue.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
