Special Issue

International Trade Governance and Policy and Sustainable Agricultural Economics

Message from the Guest Editors

This Special Issue investigates the nexus of international trade governance and foreign direct investment policies, and macroeconomic linkages related to sustainable agricultural economics. Economic policies must positively impact globally relevant issues such as climate change, water scarcity, food insecurity, poverty alleviation, environmental degradation, and resource sustainability (water, soil, and nitrogen fertilizer, etc.). Sustainability is particularly crucial when it comes to policy formulation and analysis, while conflicting economic, environmental, and social objectives move toward a resolution. We are seeking manuscripts investigating agricultural sustainability as it relates to the interaction of agricultural trade governance and environmental policies, the liberalization of specific agricultural trade, the environmentally friendly technology transfer in agriculture, free trade agreements, exchange rate policies, and biofuel policies. These polices have important effects on the trade and prices of environmentally sensitive goods. Selected papers will undergo rigorous peer review and are streamlined for rapid, widespread dissemination of the results.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
