Special Issue

Carbon Management and Decarbonization Pathways in Buildings and Infrastructure

Message from the Guest Editors

The built environment, including buildings and infrastructure, significantly contributes to global carbon emissions. To achieve ambitious climate targets, it is essential to explore comprehensive carbon management strategies and decarbonization pathways within this sector. This Special Issue invites innovative research focusing on cutting-edge methods, technologies, and policies aimed at reducing carbon footprints, enhancing energy efficiency, and promoting sustainable development in buildings and infrastructure. Topics of interest include lifecycle carbon analysis. renewable integration, intelligent energy management systems, sustainable construction materials, and policy frameworks that drive effective decarbonization. Additionally, we encourage submissions that address emerging trends, such as digitalization, smart buildings, urban planning strategies, climate resilience, and circular economy practices. We welcome contributions from multidisciplinary perspectives, providing actionable insights to advance global sustainability efforts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
