

Special Issue

Digital Technologies for Sustainable Business and the Green Economy

Message from the Guest Editor

Achieving sustainability and advancing a green economy require profound transformations in production systems, consumption patterns, and organizational decision-making processes. Digital technologies are increasingly recognized as key enablers of this transition, providing innovative tools to monitor environmental impacts, improve resource efficiency, enhance supply chain transparency, and support sustainability-driven innovation. These complex and sometimes contradictory effects highlight the need for rigorous research that critically examines how digital technologies interact with sustainability objectives across diverse industries, regions, and institutional contexts. The aim of this Special Issue is to advance both theoretical and empirical understanding of the role of digital technologies in promoting sustainable business practices and supporting the transition toward a green economy. The Special Issue encourages interdisciplinary contributions that bridge sustainability science, business and management studies, green macroeconomic systems, and policy-oriented research.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
