Sustainable Entrepreneurship and Local Economic Resilience: Academia's Critical Role in Education, Research, and Community Engagement

Message from the Guest Editor

This Special Issue aims to investigate the interplay between sustainable entrepreneurial processes, entrepreneurship education, and the role of academia in advancing local economic sustainability systems. Aligned with the transdisciplinary scope of Sustainability, we welcome contributions from the natural sciences, engineering, economics, social sciences, and the humanities. Submissions should present robust methodologies (experimental, computational, theoretical, or mixed-methods) that contribute to the journal's mission of supporting open science, reproducibility, and disseminating insights for practical implementation.
