

Special Issue

Sustainable Management Systems for Sustainable Organizations

Message from the Guest Editors

As the global community seeks to move towards sustainable stewardship of our natural and social systems, the roles of nations, organizations and individuals in achieving sustainable outcomes is constantly expanding. Matching the ambitious scope of the UN's Sustainable Development Goals (SDGs), actions and changing patterns of behavior are required by all organizations. This issue is intentionally broad in its scope, and we hope to gather a variety of perspectives relating to how organizations are adapting to the sustainability imperative, with a potential focus on those adaptations required at the human level.

- How are organizations adapting to the challenges of sustaining a new workforce while addressing issues of sustainability?
- How are organizations developing new productive systems, and measures of performance, in response to the challenges confronting the world economy?
- How is enhanced flexibility being incorporated into HRM systems as a means to ensure greater employee commitment and organizational longevity?
- From the human point of view, what sustainability values are important for employees and customers in organizations they engage with?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
