

## Special Issue

# Multimodal Transportation Hubs: Strategies, Technologies, and Policies for Intermodal Operation Efficiency

### Message from the Guest Editors

Transportation hubs—such as ports, airports, and intermodal platform—are crucial components of the logistic supply chain. They serve as critical points of transfer and exchange for goods and services between different modes of transportation. The effective management of these hubs is essential for the smooth and efficient flow of goods and services in global trade and commerce. Being able to run and manage transportation hubs effectively and efficiently can lead to reduced costs (thus, challenging the full-road transportation mode), improved productivity, enhanced safety and quality, improved environmental performance and increased equality. However, transportation hubs are complex fields that require the integration of multiple disciplines and stakeholders. This Special Issue aims to be a one-stop platform for researchers and practitioners to share knowledge, expertise, policies and on-field applications on this important topic, including qualitative and quantitative research.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
