

## Special Issue

# Sustainability in Resources Recovery Research and Environmental Chemical Engineering

### Message from the Guest Editor

Resources include nonrenewable minerals and fossil fuels and renewable biogases and biofuels, as well as water and nutrients. Having a secure supply of resources plays a significant role in satisfying growing life standards and industrial applications. The recovery of resources in a more sustainable approach is crucial in exploiting and conserving natural resources, preventing secondary pollution, protecting the environment, and accomplishing a carbon-neutral economy. The aim of this Special Issue is to provide a platform for the publication of applied or fundamental research on greener and more sustainable materials and technologies and more eco-friendly engineering solutions for resources recovery.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
