# **Topical Collection**

# Digital Processes in Social, Cultural and Ecological Conservation

### Message from the Collection Editors

This Topical Collection seeks to be a privileged space for framing, discussing, assessing, and reflecting on the implications of technology and digital culture, as elements which are increasingly present in contemporary societies and which are relevant in the reconfiguration of the reference contexts of human action and in shaping the relationships between human and nonhuman actors, in the polyhedral conservation process, expression of interdependent relationships between nature and culture—not limited to the conservation of wilderness, but including human beings in this process—imbricated in a conception of nature as a source of values, marked by the polarization between the intrinsic value of nature and the subsumption of values that are natural to economic values.

The purpose of this topical collection is to contribute to the development of the state-of-the-art in this research area, whether in a more practical or a more theoretical way, through the publication of manuscripts of different types, based on a solidly supported argumentation, in the form of research article, review, comment or original reasoned reflection in diverse contexts.

# **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
