

Special Issue

Reliability, Sustainability and Risk Management of Energy and Pipeline Systems for a Low-Carbon Future

Message from the Guest Editors

This Special Issue thoroughly examines the development of the reliability, sustainability, and risk management of energy and pipeline systems for a low-carbon future. It divides the creation of the integrity system into management system creation and technological development and the prediction of the future development trend of energy and pipeline integrity management systems under the theme of "striving to build a full life cycle of smart energy and pipeline networks", which has important practical value for the technological innovation and management innovation of energy and pipeline enterprises.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
