Advances in Intelligent Transportation, Smart Grids and Electric Vehicles in the Context of Sustainability

Message from the Guest Editors

In recent years, with the increasing emphasis on sustainability, the transportation industry has undergone profound transformations. Intelligent transportation systems and public transportation have emerged as crucial elements in the pursuit of sustainable mobility. They not only provide solutions to alleviate traffic congestion, reduce carbon emissions, and improve the overall travel experience but also establish closer connections with other critical infrastructures, such as the power grid. Intelligent transportation technologies, such as connected vehicles, advanced traffic management systems, and intelligent parking solutions, are revolutionizing our travel patterns. These innovations optimize traffic flow, enhance safety, and improve the utilization efficiency of transportation infrastructure. Meanwhile, public transportation, including buses, metros, and light rails, remains the cornerstone of sustainable urban mobility, providing convenient and environmentally friendly options for commuters. In addition, the synergy between transportation and the power grid represents an emerging and equally significant aspect.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
