

Special Issue

Applications of AI and Blockchain for Autonomous Driving in Safe and Sustainable Transport Systems

Message from the Guest Editors

Cutting-edge artificial intelligence and blockchain technologies have the potential to reform transport systems' safety, efficiency, and sustainability. AI-powered solutions enable autonomous vehicles to navigate complex environments, analyze real-time data, make intelligent decisions, and respond to potential hazards. Blockchain technologies offer decentralized and secure platforms for data sharing and management, fostering trust and cooperation among various stakeholders in the transportation ecosystem. Both AI and blockchains can play critical roles in improving the overall sustainability of transport systems by optimizing energy usage and reducing waste. Key applications of AI and blockchain in transportation include: *Data Sharing and Security; V2X Communication; Fleet Management; Supply Chain Management; Environmental Sustainability; Traffic Optimization; Ride-Sharing and MaaS.*

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
