

Special Issue

Environmental Economics, Policies and Sustainable Economic Development

Message from the Guest Editor

This Issue explores the multifaceted relationships between economic activities and environmental protection. It will highlight the critical role of environmental pollution control in mitigating the adverse impacts of economic growth on the environment.

Through the lens of innovation in pollution control technology, this Special Issue will examine how technological advancements can drive more efficient and effective pollution management strategies. The dynamic control of environmental governance is another focal point, emphasizing the need for adaptive and responsive policies to address evolving environmental challenges.

The Issue will also delve into the dynamic analysis of product and process innovation. It seeks to underscore the importance of continuous innovation in both product design and production processes to reduce environmental footprints and enhance resource efficiency.

Overall, the Issue will provide a comprehensive overview of the latest developments and applications in environmental economics, emphasizing the interplay between economic policies, technological innovation, and sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
