

Special Issue

Energy, Environmental Policy and Sustainable Development

Message from the Guest Editors

Over the last few centuries, human activities under the current development model have intensified their influence on the environment, triggering environmental, social and economic problems. Faced with the challenge of addressing this situation, a new paradigm of sustainable development has arisen in which the energy system plays a key role. In this context, the proper design of energy and environmental policies to promote the energy system transition and the sustainable use of resources is crucial. The aim of the Special Issue is to investigate the sustainability implications of policies, strategies or technologies for energy production that are postulated to be key to the energy transition. In this Special Issue, original research articles and reviews are welcome. Research on the sustainability assessment of case studies of innovative and emerging energy technologies, energy system impact and potential scenarios of energy technology diffusion, as well as the development of methodological innovations in sustainability assessment, are relevant to the Special Issue. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
