

Special Issue

Recycled Construction and Demolition Materials for Sustainable Development

Message from the Guest Editors

Waste materials produced during construction and demolition (C&D) activities cause severe environmental and economic problems worldwide. Whereas, research conducted in recent years has shown that recycled or reclaimed C&D materials have the potential to provide a more sustainable approach to development. In this Special Issue of *Sustainability*, we aim to publish contributions of experimental, analytical and numerical investigations that evaluate the performance of construction materials fully or partially consisting of C&D waste. Submissions are also sought from research works regarding new developments of recycling technologies related to C&D waste. Both original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Properties of recycled C&D materials;
- Soil stabilization using C&D materials;
- Solid waste management;
- C&D materials in road pavements;
- Environmental impact assessment;
- Mechanical and structural performance;
- New construction technologies;
- Case studies and/or field trials.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
