

## Special Issue

# Thermal and Energy Performance of Skyrise Greenery in High-Density Cities

### Message from the Guest Editors

This Special Issue aims to provide a more focused platform for a selection of papers introducing the thermal and energy performance of diverse, innovative vertical greenery design at different scales, as well as the latest research progress about its effect on improving the ecological and economic benefits. Articles related to (but not limited to) the following topics are encouraged for submission:

- Thermal and energy performance of a vertical greenery system or its variant in different climate zones, as well as the effect of plant species and soil.
- The heat transfer mechanism of drainage structure and materials and its impact on the thermal performance of vertical greenery.
- The interaction mechanism between a vertical greenery system and renewable energy system and its effect on thermal performance and energy production.
- The effect of vertical greenery design strategy on urban microclimate at the local scale.
- The microclimate of a vertical farming system as well as its influencing factors and optimization methods.
- The economic and ecological impact of thermal performance of a vertical greenery system.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
